SUMMARY

I am a learn-it-all Lagos based Nigerian, male who enjoys using new technologies to build effective and relevant solutions/tools. I specialize in ReactJS/Redux/ApolloClient, NodeJS/Express/AdonisJs, and Python/Flask/Django, and i'm experienced in executing projects from concept to delivery, while working in a software development team.

WORK EXPERIENCE

Software Developer, FreeLancer - March/*2020 - present* - Lagos, Nigeria

I work with local businesses in building a tool to ease their process of operating their business.

- ⇢ Collaborated with other software developers to maintain different products.
- ⇢ Assembled a team to build a software product for an insurance firm
- ⇢ Worked on the backend of an issue tracking system

Software Developer, Andela - June/*2019 - September/2019* - Lagos, Nigeria

Andela invests in Africa's most talented developers and integrates them into the world's best tech companies.

- ⇢ Collaborated with other software developers to maintain the back end of an in house asset management tool(Activo).
- ⇢ Worked in an agile(scrum) methodology
- ⇢ Worked with Git workflow and industry-standard code conventions.
- ⇢ Effectively communicated with product managers and fellow engineers, to map out software requirements for each application feature.
- ⇢ Tested solutions for effectiveness.
- ⇢ Implored continuous integration tools, like circle-ci, to secure existing features and minimize the introduction of bugs.
- ⇢ Built full-stack web applications using ReactJS, NodeJs, PostgreSQL.

Customer Information Service - intern, Guaranty Trust Bank(GTBank) - June/*2017 - August/2018 -* Lagos, Nigeria**.**

GTBank offers Online/Internet Banking, Retail Banking, Corporate Banking, Investment Banking, and Asset Management services

⇢ Interacted with customers and co-workers to help resolve complaints/inquiries.

⇢ Documented each customer request, and file them appropriately

SIDE PROJECTS

Qustomar: An issue ticketing platform that enables companies to track their SLA's and other issues from start to finish seamlessly. (worked on the backend and it is written in NodeJS/AdonisJS)

Banka: A full-stack Banking app, that powers single bank transactions like withdrawal, deposit and so on (ReactJS/Redux, PostgreSQL, NodeJS/ExpressJS)

Author's Haven: A Platform for the creative at heart to share their thoughts on numerous tech-inclined topics (ReactJS, PostgreSQL, Redux, HTML, CSS, SCSS, NodeJs)
